

Vaccine Amnesty

National Vaccination Month - March 2008
At Runnymede Hill Veterinary Hospital

Full Vaccination Course for the price of a Yearly Booster!...

Did you know that your pet is at risk if it has not been vaccinated in the last 18 months?

During the month of March 2008 we would like to invite all those clients whose pets have not been vaccinated for over 18 months back to our surgery for a full veterinary health check and re-vaccination program (normally 2 injections two or three weeks apart to get your pet back on track and fully protected!)

All this for just the cost of a normal yearly booster vaccination.

Regular vaccinations are an extremely effective and safe way of preventing some of the major diseases which may affect your pet dog or cat. Did you know 45% of dogs and 54% of cats over the age of 2 in the UK are unvaccinated and at risk from serious diseases such as Parvovirus and Cat Flu? Not surprisingly last year saw an alarming rise in Parvovirus cases in our area.

More details about re-vaccination can be obtained in the form of a leaflet from the surgery - this goes into considerable detail about immune responses, and why booster vaccinations need to be given.

To book your pet in for a full health check and re-vaccination or if you have any questions please telephone **01784 436367** for and ask for a 'Vaccine Amnesty' appointment.
